

## HCS Pharma secures 20 Million EUR capital commitment from the GEM group for the development of BIOMIMESYS® products.

Lille, France – 02/08/2021: **HCS Pharma, announced today that it has signed an agreement with GEM Global Yield LLC SCS ("GEM") a Luxemburg-based private alternative investment group for a EUR 20 million capital commitment.**

Under the agreement, GEM commits to provide HCS Pharma with a share subscription facility of up to EUR 20 million for a 36-month term following the public listing of the company shares on a European National Stock Exchange. HCS Pharma will control the timing and maximum amount of drawdown under the facility and has no minimum drawdown obligation. Concurrent to the public listing of HCS Pharma Shares, GEM will receive warrants to purchase shares of the company.

Subject to the funding becoming available, the proceeds will be used to expand the commercialization of the range of products BIOMIMESYS® in the global market. BIOMIMESYS® is already recognized as a disruptive technology in drug discovery and HCS Pharma has been listed in the “top43” deep tech companies coached by Invest Horizon European program in 2020.

“The GEM commitment is a very valuable support to our strategy”, said Nathalie MAUBON (PhD, founder and CEO of HCS Pharma). “This funding associated with the public listing, will help us to accelerate the development and commercialization of BIOMIMESYS®, the first organ-specific hydroscaffold on the market that recreates the most faithfully the 3D environment of any healthy or cancerous organ. The use of our 3D and physiological cell culture matrix will help changing the drug discovery process in order to break the wall of “90% of failure” in clinical trials, due to efficacy and safety issues. With BIOMIMESYS, we will allow pharma and biotech providing more efficient treatments, with a cheaper and faster drug development process.”

### About HCS Pharma

HCS Pharma is a biotech start-up located in Lille that develops and markets 3D cell culture products based on its proprietary BIOMIMESYS® technology and develops its own 3D cell models alone or in partnership that it offers to their customers from pharmaceutical, dermo-cosmetic and food industries. HCS Pharma team has unique expertise in the development of new 3D in vitro models and their miniaturization and automation to perform high throughput screening in order to analyze efficacy or toxicity effects of a large number of products. BIOMIMESYS® is a groundbreaking 3D technology that enables the faithful reproduction of the microenvironment, also called Extra-Cellular Matrix (ECM) of any organ/tissue, healthy or cancerous. It is also the only ready-to-use organ-specific 3D technology usable in medium/high throughput screening of molecules using cellular imaging technology called High Content Screening (HCS).

### About GEM Group

Global Emerging Markets ("GEM") is an alternative investment group based in Paris, New York and Los Angeles. GEM manages a diverse set of investment vehicles focused on emerging markets that provide the group and its investors with a diversified portfolio of asset classes that span the global private investing spectrum. Each investment vehicle has a different degree of operational control, risk-adjusted return and liquidity profile. The family of funds and investment vehicles provide GEM and its partners with exposure to: Small-Mid Cap Management Buyouts, Private Investments in Public Equities (PIPEs) and select venture investments.
